ABOUT UNIPOWER

UNIPOWER is a world leading provider of dependable, high-efficiency power electronics, energy conversion systems and power supplies. UNIPOWER's products include a complete line of high-efficiency rectifiers, inverters and DC power systems for cable & datacomm applications.

For embedded applications, the EASYMOD product line is designed specifically for the customer where a reliable off-the-shelf mass market product will not suffice.

With over 25 years experience supporting customers in more than 60 countries, UNIPOWER is focused on bringing reliable power solutions to customers across all applications and environments.

The UNIPOWER Solution® for your Embedded Power needs

IF WHAT YOU NEED IS WHAT YOU NEVER GET in AC and or DC INPUT SWITCHERS, a UNIPOWER EASYMOD® is your first choice for up to 350 watts steady state of high reliability power conversion. Universal AC input and DC input power can be found in the UNIPOWER EASYMOD® family of switching Power Supplies. This family includes, the ACMOD AC/DC power supplies, DCMOD® DC/DC converters and MEDIMOD® medical power supplies. All models are available in a complete range of single to quad output configurations from 1.5 to >48VDC with power ratings from 40W to 350W. The entire family has on-board EMI filtering, is CE marked, complies with current safety and quality standards, delivers continuous full power output to 50°C and is capable of operation to over 70°C. Product is available with either an AC input OR a DC input with the identical customer specified outputs.

EASYMOD® simply means: **IF WHAT YOU SEE IS WHAT YOU CAN'T USE, CALL UNIPOWER NOW.** EASYMODs® include: extended temperature operating range (-40°C to greater than 70°C), isolated outputs, customer specified unique output combinations, DC inputs, unique cables & harnesses and much more. All of these modifications are available at nominal (if any) additional cost; usually without any impact on safety agency approvals, which reduces both development cost and time to market; and little or no NRE.

Our Customers

UNIPOWER has delivered almost 1,000,000 EASYMODs® to world-class companies in North America, Europe, Middle East, Africa and Asia. Our customers manufacture products for a range of applications in Telecom, Cable, Datacomm, Sat-Com, Oil Exploration, Power Utilities, Energy, Medical and a host of other markets.

Our commitment - "Only Our Best Will Do"

UNIPOWER's mission is to provide superior service and superior designed, highly robust products for our customers in all markets. We know that understanding our customers concerns means listening to their needs and designing a specific solution to meet their unique requirements.

ACMOD® & MEDIMOD®

**5 YEAR
WARRANTY**

DCMOD®

KEY FEATURES

- One to four customer specified outputs
- Outputs from 1.5 volts to >48 volts
- Extended Temperature range from -40°C to over 85°C
- Constant Voltage/constant Current on single output models
- Medical approved models in the same packages
- Operation to 440Hz

KEY FEATURES

- One to four customer specified outputs
- Outputs from 1.5 volts to >48 volts
- Extended Temperature range from -40°C to over 85°C
- 12, 24, 48 and higher DC input Voltages available
- Identical output configuration as AC input units
- Agency approvals

Why Choose UNIPOWER?

- **Experienced Team.** With more than 25 years' experience, the UNIPOWER team provides industry leading expertise to help you make the right power decisions for your product.
- **Global Service Network.** With a global network, UNIPOWER is located close to your operation for fast, dependable delivery and service. We speak the language and live the culture of our global customers.
- **Industry Leading Quality System.** UNIPOWER guarantees reliability with a full range of internationally accredited regulatory quality approvals.
- **Flexibility to meet your needs.** UNIPOWER will customize solutions to meet your application needs.
